PENTO - front mounted roller shutters

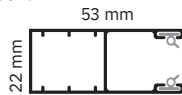

5-angle aluminium box

The PENTO ROLLER SHUTTER BOX is made in a classic 5-angle form with its bottom section having a 20° incline. The box is made from rolled aluminium, high quality casted side brackets. It's available in a number of colours including our 8 attractive standard colours. There is also choice between any colour on the RAL scale and a series of other colours on special request.

Its metal WINDING TUBE is made from galvanised steel with circular bearings and safety springs.

Its RAILS are made from powder coated extruded aluminium which, on the inside, are fitted either with rubber or with a brush.

ALUMINO SLATS:
 Aluminium slats are insulated with environmentally friendly foam and are powder coated (22 different standard colours, profile 37, 44 or 52mm).

PVC SLATS:
 We've made our slats from PVC with five connecting parts to make them stronger (8 standard colours, 37 or 53 mm profile).

MANAGEMENT OPTIONS:

Manually with belt (standard)

Manually with crank

Motor with switch

Motor with remote control

For information about box dimensions please feel free to contact us on the details at the top of the page.

Why buy a Avora Doors roller shutter?

Rules and regulations:
 We make sure that all our systems meet European standards at an absolute minimum.

Shading and ventilation:
 A **Avora Doors roller shutter** will allow you to completely shade your room whilst maintaining the ventilation you need. This is done through some carefully placed slots at the base of each slat.

Mounting and fitting:
 We have experienced mounting teams who ensure fast delivery and quality fitting. They are also happy to give you any expert advice you need.

Heat saving:
 Installing a roller shutter allows you to make savings on your energy bill in winter. You can reduce heat loss by up to 30%.

Safety:
 Feel safer at home and reduce the chances of anyone successfully breaking into your house. A closed roller shutter extends break in times and increases the noise of anyone trying to get in.

Protection in all conditions:
 Roller shutters aren't just for summer. They offer protection against wind, rain, snow, hail and even heat from the sun.

An investment for life:
 A new roller shutter represents a long term investment. The strong, durable aluminium and the robust mechanical design will ensure you have a roller shutter for life.

Fully customisable:
 You have the choice between a vast amount of shapes and colours. All of this means you can craft the roller shutter that's perfect for you and your home.

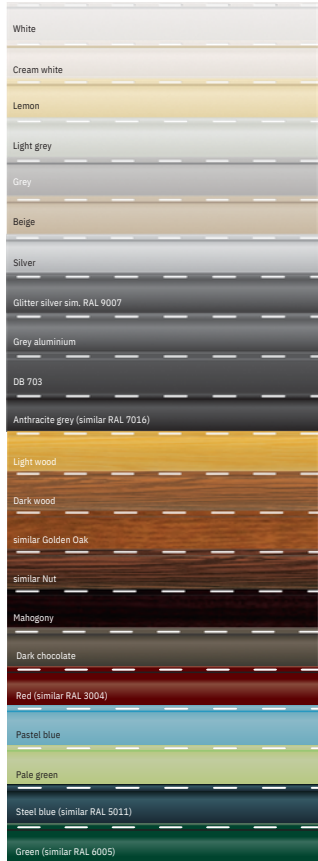

Environmentally friendly:
 At **Avora Doors** we make sure that we are looking out for the best interests of the environment as well as our customers. That's why we fill our slats with polyurethane foam which, unlike other foams, do not release CFC gasses which damage our ozone layer.
